

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

1. (Currently Amended) An opening/closing structure for a tray of an automobile comprising:

a main body ~~for storing~~ that stores various kinds of small items and having a through-hole at its lower end;

a door ~~for opening/closing~~ that opens/closes by rotating upward a front surface of the main body by using a rotary ~~means~~ device, and provided with a hooking hole conforming to a position of the through-hole;

a button part installed at the lower end of the main body; and

a fixing hook part installed at an inner part of the button part, and inserted or released in/from the hooking hole through the through-hole depending on a snap operation of the button.

2. (Original) The opening/closing structure according to claim 1, wherein the button part comprises:

a fixing plate mounted on a lower end of the main body and having a button hole formed at its front surface;

P24733.A01

a button partially inserted into the button hole; and

a button spring mounted on a rear surface of the button and having a recovery force when the button is operated.

3. (Currently Amended) The opening/closing structure according to claim 1, wherein the fixing hook part, installed in the fixing plate, comprises:

a protrusion inserted into the hooking hole through the through-hole;

a protruding plate extended from the protrusion and spaced apart from the rear surface of the button;

a fixing spring mounted on a lower end of the protruding plate; and

an inclined plate installed at the protruding plate and having an inclined surface ~~for moving~~ that moves the fixing hook downward when the button is pressed
